Designing with intention.

I'm a Web Developer & IT Programmer based in Lampung, Indonesia. D3 Information Management graduate from Politeknik Negeri Lampung, specialised in modern, performant, and responsive web interfaces.

I care about clarity, motion, and the small details that make products feel effortless. My toolkit centers on React, TypeScript and Tailwind — paired with a strong eye for UI and craft.

TECH STACK

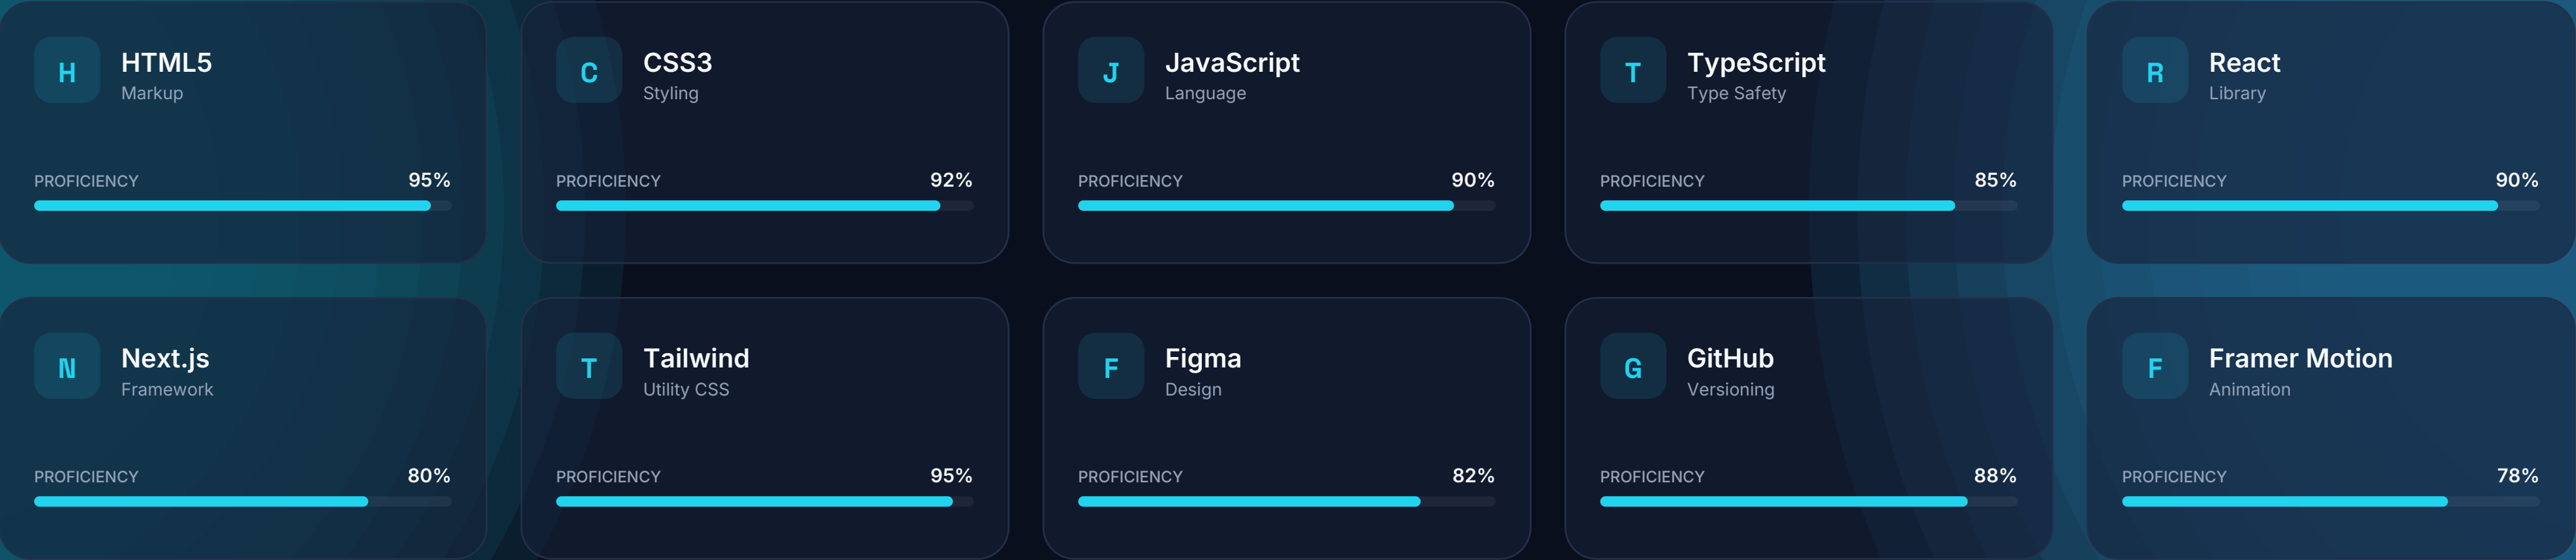

PHILOSOPHY

“Simplicity is the keynote of all true elegance.”

— principle behind every interface I build

The stack I build with.

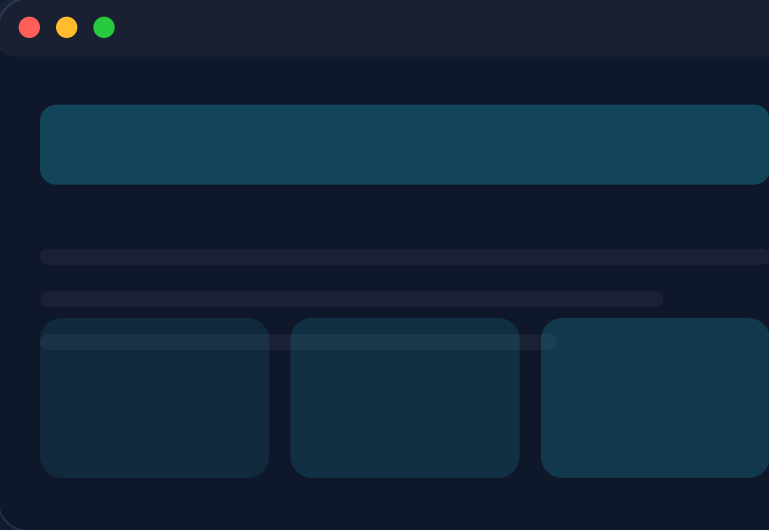

A modern frontend toolkit — battle-tested, performant, and beautiful.

03 / SELECTED PROJECTS

Recent work.

A curated selection of interfaces, products and explorations.

Thumbnail showing a dark navy portfolio interface with cyan accents, smooth motion, and responsive layouts.

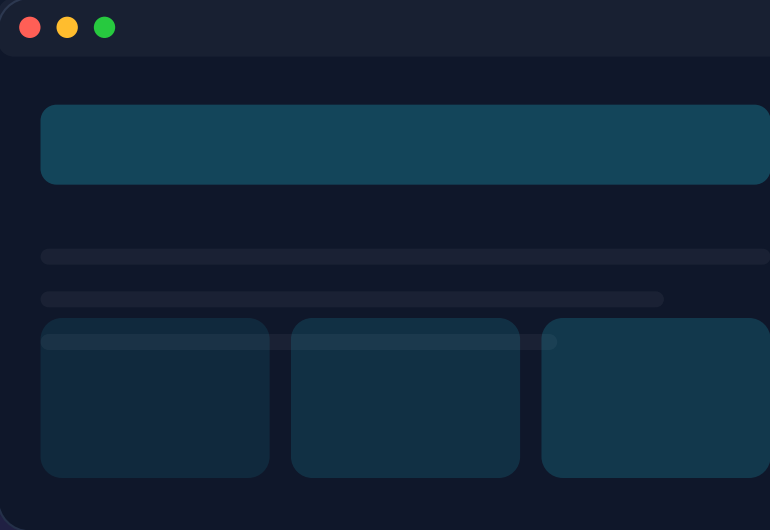

REACT · TAILWIND · FRAMER MOTION

Personal Portfolio

Dark navy portfolio with cyan accents, smooth motion, and responsive layouts.

Next.js Stripe

Personal Portfolio

A dark, cinematic showcase built with React, Tailwind and Framer Motion.

THE CHALLENGE

Build a portfolio that feels cinematic without compromising performance or accessibility.

THE APPROACH

- Dark navy + cyan accent system
- Bento layout, large display type
- Framer Motion micro-interactions
- Responsive across all breakpoints

100/100

LIGHTHOUSE PERFORMANCE

From idea to interface.

A structured workflow that turns ambiguity into polished, shipped product.

01
Research
Understand user, goals, constraints.

02
Wireframe
Sketch flows, structure information.

03
Design System
Tokens, components, scale, motion.

04
UI Design
High-fidelity, responsive layouts.

05
Develop
Type-safe React with Tailwind.

06
Ship
Optimize, measure, iterate.

Services.

End-to-end frontend craft — from first sketch to deployed product.

Frontend Development

React, Next.js & TypeScript apps built with attention to performance, accessibility and motion.

DELIVERABLES

Design · Code · Deploy

Responsive Websites

Marketing sites, portfolios, and landing pages that look immaculate on every screen.

DELIVERABLES

Design · Code · Deploy

UI / UX Design

Design systems, components, and interfaces with a strong visual hierarchy.

DELIVERABLES

Design · Code · Deploy

Web Optimization

Lighthouse-grade performance, SEO, and modern best practices.

DELIVERABLES

Design · Code · Deploy

Let's build something amazing.

Open for freelance, collaboration and full-time opportunities.
