About Me

Get to know who I am, what I build, and how I work.

Fresh Graduate · D3 Information Management

Hello! I'm **Andri Wahidin**, a graduate of D3 Information Management from **Politeknik Negeri Lampung** with a GPA of **3.65 / 4.00**. I am passionate about building modern web applications across the full stack — from REST APIs and database design to polished UI/UX.

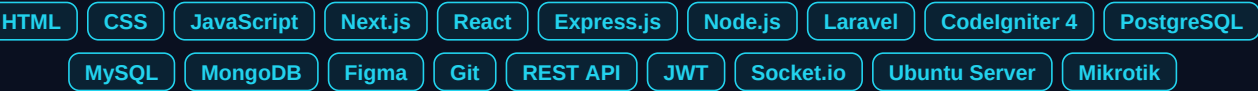

During my internship at **CV Newus Technology** I worked as a Backend Developer on the **E-Ticket Museum Lampung** project, building APIs with Express.js + PostgreSQL and contributing to the Figma UI/UX design.

I hold **BNSP Junior Web Programmer** certification and **NDG Linux Essentials** from Cisco Networking Academy. I value clean architecture, clear communication, and shipping reliable features that solve real problems.

CORE SKILLS

TECHNOLOGIES

Selected Projects

Web apps across ticketing, e-commerce, education, and infrastructure. Full case studies at <https://andri-wahidin-portfolio.vercel.app/>

01 E-Ticket Museum Lampung

Tourism & Ticketing · Backend Developer & UI/UX Designer · Mar – Jun 2025

A digital ticketing system for Lampung Museum with online booking, visitor management, and statistical reporting.

Context · Final project for internship at CV Newus Technology

KEY FEATURES

- › Online booking with category & pricing
- › Real-time visitor stats
- › QR-code tickets
- › Admin dashboard

TECH STACK

Next.js

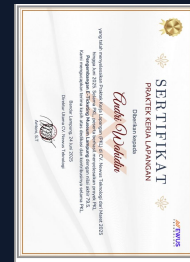

Express.js

PostgreSQL

Figma

JWT

REST API

02 Pencak Silat Championship System

Sports Management · Fullstack Developer · Academic Project 2024

Web information system for pencak silat tournaments with online registration, automated scheduling, and digital judging.

Context · University course project (PUM)

KEY FEATURES

- › Online registration with documents
- › Auto match scheduling
- › Digital judging with live scoring
- › Automatic certificate generation

TECH STACK

CodeIgniter 4

PHP

MySQL

JavaScript

Bootstrap

AJAX

03 Student Aspiration Platform

Campus Management · Fullstack Developer · Personal Project 2025

Complaint & suggestion platform with anonymous submissions, real-time tracking, and an admin dashboard.

Context · Helps students voice concerns to campus administration

KEY FEATURES

- › Anonymous or public complaints
- › Status tracking submitted → resolved
- › Email notifications
- › Admin analytics & reporting

TECH STACK

Laravel

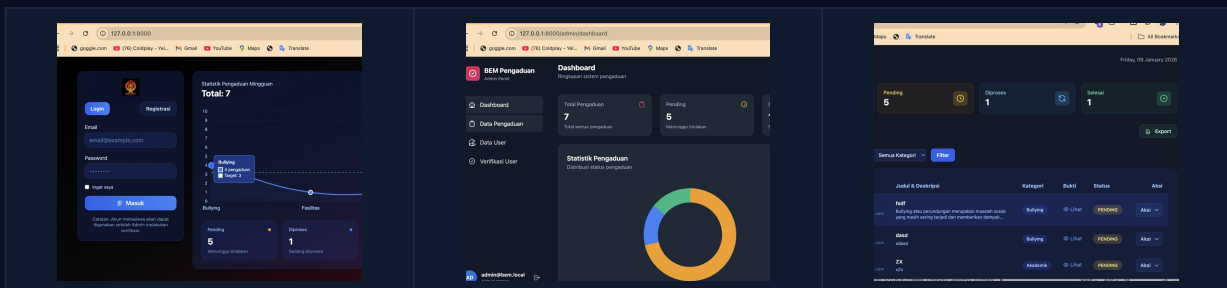

PHP

MySQL

Bootstrap

AJAX

SMTP

04 QR-Based Attendance System

Attendance System · Fullstack Developer · Project 2025

Attendance management using daily-unique QR codes, real-time tracking, and detailed reports.

Context · Digital attendance for educational institutions

KEY FEATURES

- › Daily-rotating unique QR codes
- › Real-time tracking via Socket.io
- › PDF & Excel reports
- › Multi-role: admin / teacher / student

TECH STACK

React.js

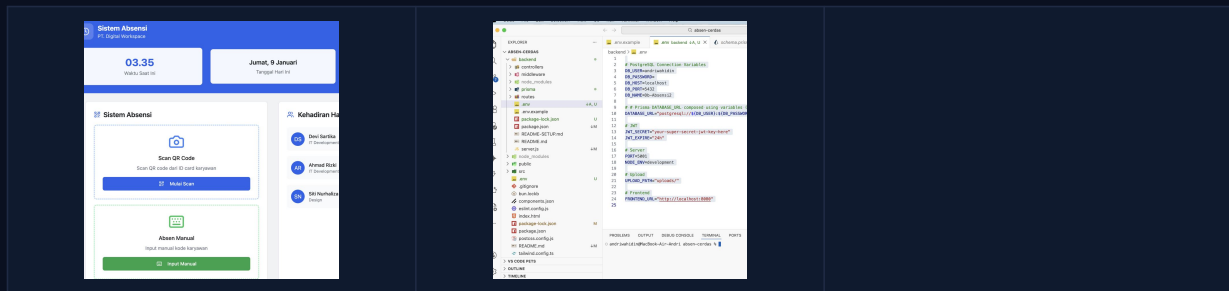

Express.js

Node.js

MySQL

QR Code

Socket.io

05 WebStore E-Commerce Platform

E-Commerce · Fullstack Developer · Certification Project 2025

Full e-commerce platform with shopping cart, checkout, and product management.

Context · BNSP Junior Web Programmer certification project

KEY FEATURES

- › Cart with auto calculation
- › Multi-gateway checkout
- › Admin CRUD for products/orders
- › Product rating & reviews

TECH STACK

CodeIgniter 4

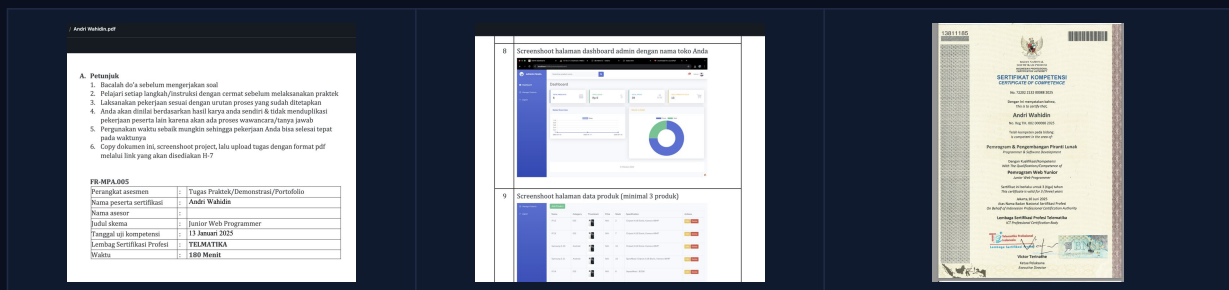

PHP

MySQL

Bootstrap

jQuery

REST API

06

Project Approval System

Business Management · Fullstack Developer · Project 2025

Project proposal & approval system with multi-level workflow and real-time notifications.

Context · Project management for corporate environments

KEY FEATURES
